

survey reflected a total of 8041 dwelling units or an increase of 89 units above the 1970 housing census. To verify this noticeable increase, verification was made by checking the number of building permits issued for new home construction. Verification reflected that 47 permits were issued in 1970 and 29 permits issued from January to August 1971 or a total of 76. An increase in the number of mobile homes could account for the remaining 13 units. The following is a breakdown of the 1971 visual survey.

1971 VISUAL HOUSING SURVEY - KINSTON, NORTH CAROLINA

CITY LIMITS:

Standard Units:	5710
